

Two Powerful Products. One Ground-breaking System.

Manage Your Maintenance and Calibrations with FaciliWorks 8i Calibration.

FaciliWorks 8i Calibration combines all of the benefits of FaciliWorks 8i with the power of our GAGetrak software, the world's leading calibration management software, to deliver an all-in-one enterprise asset management server solution. In addition to the asset management functions of FaciliWorks, 8i Calibration offers:

- Gage management - gage records, attributes, parts, history, track as-found condition of gages
- Gage crib manager - issue and return traceability
- Out-of-tolerance alert - calibration trigger
- Calibration request - email notification, multiple gages
- Calibrations - scheduled and unscheduled, due dates
- Produce calibration certificates
- Capture all measurement readings
- Standards compliance - ISO, TS, AS, ANSI and FDA compliance (single-track validation)
- Ability to print durable, auditable calibration labels

The screenshot shows a 'Calibration' record form. The 'Record' is 14 of 4 (Filtered). The form includes fields for Gage ID (01-Digital Indicator), Status (Active), Gage SN (13767), Calb Freq (30 Days), Next Due Date (11/30/2014), Calibration Date (11/30/2014), Department (Cal Lab), Calibration Type (Standard), Results, Action Required, As Found Condition (In), Calibration Status (Passed), Interval Adjustment Method (None), and Findings. It also has fields for Description (Digital Indicator), Est Costs (45.00), Costs (27.00), Hours (0/2), Account No, Certificate No, Uncertainty (0), Coverage Factor K (0), Degrees of Freedom (0), Temperature, Humidity, Pressure, and Other.

You can schedule a PM and a calibration on the same asset, assign a gage ID as a standard and attach calibration certificates to procedure records. And, because calibration and asset management are combined into one system, our 8i Calibration Validation Kit meets requirements for single-track FDA validation.

The screenshot shows a 'Gage Record' form. The 'Record' is 2 of 5 (Filtered). The form includes fields for Gage ID (Slp-gage 4458he), Gage Description (028" Step Gage), Status (Active), Ref. Standard (checked), NIST No (122235), Gage SN (SN389253), Gage No (111382-387), Model No (lh13532), Gage Type (Step Gage), UOM (1), Drawing No, Drawing Date, Change Level, Change Date, Notes, Storage Location (Mechanical Equip Rm.), Current Location (Building 2), In Service (12/12/2012), Retirement Date, Supplier Code, Cost (\$50.00), Purchase Date, User1, User2, Manufacturer (McGinSaw Manufacturing Industry), and Owner (Thomas Paul). Buttons at the bottom include Save, Cancel, Issue / Return, Clone, Calibration, Attach Standards, and Attach Procedures.

Contact us today for your free 30-day trial or web demonstration and we'll show you how FaciliWorks 8i Calibration will work for you.
