Six Best Practices for Fire Prevention

A fire is one of the costliest hazards to a building. Follow these steps to mitigate the risk of a fire in your facility.

A fire at your commercial real estate property is one of the most difficult challenges you could face. Between medical costs, lost wages, damages to your building, and interruptions to service, fires are one of the costliest hazards. As recently as 2019, fires in the United States caused nearly \$14.82 billion in property loss alone, according to [Statista](#). That's why taking steps to recognize hazards—and correcting them—is so important. Fortunately, a common set of [NFPA](#) and local standards can help your team spot warning signs and help you proactively manage risks — regardless of who occupies your building. Here are a set of recommendations for facility managers to help get started preparing for fire prevention...

It's time to get your Quality Team involved!

Did you know that you can add calibration management to your FaciliWorks 8i software?

Regardless of how your company's maintenance

and calibration departments interact with each other, having a single, centralized database to control both assets and measurement equipment is not only convenient, but maximizes efficiency, reduces costs and simplifies regulatory compliance.

Contact us today for your free web demonstration and we'll show you how FaciliWorks 8i Calibration will work for you.

EMAIL US

Add calibration management to FaciliWorks to get these must-have features:

- Gage management - gage records, attributes, parts, history, track as-found condition of gages
- Gage traceability - complete historical cross-reference
- Gage crib manager - issue and return traceability
- Out-of-tolerance alert - calibration trigger
- Calibration request - email notification, multiple gages
- Calibrations - scheduled, unscheduled, due dates
- Produce calibration certificates
- Capture all measurement readings
- ISO, TS, AS, ANSI and FDA compliance (single-track validation)
- Print durable, auditable calibration labels

WEB TRAINING

Early July

Mid July

Late July

Session 1: July 12
Session 2: July 13
Session 3: July 14
Session 4: July 15
Session 5: July 16

Session 1: July 19
Session 2: July 20
Session 3: July 21
Session 4: July 22
Session 5: July 23

Session 1: July 26
Session 2: July 27
Session 3: July 28
Session 4: July 29
Session 5: July 30

To register for any of these sessions or for info about custom training options, please contact our Training Specialist at 1-800-776-3090 ext. 134 or training@cybermetrics.com.

TECH TIP

Allowing User Personal Settings in FaciliWorks 8i

While you are assigning User IDs to specific security groups, you may want to allow one or more security groups the ability to configure the look and the feel of the application. To do so, the administrator must first navigate to **Configuration -> Global Settings**, check the **Allow User Personal Settings** checkbox at the bottom of that form and then click **Save**.

Now, the administrator can grant the security group access to these settings. Navigate to the **Personnel -> Security -> Groups Permission tab**. Select the group, click the **Form** radio button and then select **Personal Settings** in the associated drop-down list. Select **Add Edit Delete** permissions and then click **Save**.

Group

Select Object

- Form
- Form Control
- Report
- Report Control
- Functions

Select Form

Permissions (exceptions to the default properties)

- No Access
- Read Only
- Add Edit Delete

Each User ID within the designated security group will now have the ability to set up personal preferences, like hiding main menu icons, changing the color theme and creating personalized shortcut links to critical areas of the application.

We encourage you to explore the additional capabilities of your FaciliWorks software and as always, keep an eye out for future Tech Tips.
